arsenal was dismantled. The dismantling of designated items was finished by October and the machinery shipped northward to Tsitsihar early in November. In addition, a portion of the arsenal personnel was ordered north. The purpose of this move was to equip the North Manchurian arsenal for greater production and to escape United Nations air raids which might come in the event of a breakdown in the Korean cease-fire talks.

4. On the evening of 5 November several thousand land mines, which had been shipped from Mukden to Antung, exploded while being unloaded at the Antung railway station. The cause was unknown, but all the mines were destroyed and heavy damage was done to buildings near the railway station and to the roaded. Over 200 railway employees and engineers who escorted the shipment were killed or wounded.

25X1

As of 18 November, Chinese Communist forces in North China were comparatively weak. Previously, various haien along the Peiping-Hankow railway in Peiping, Tientsin and northeactern Hopei had been garrisoned by units from the North China Army Group. Most of these troops, however, had gone to North Korea, and example for Peiping and Tientsin, where large forces were still being maintained, all other places were garrisoned of local haien security forces. The 61 and 62 Armies were in Peiping, Tientsin and along the railway from Peiping to Shanhaikuan, while the 59 Army allegedly was in Taiyuan.
